

Project Profile

Location:

India and USA

Project:

IATRO

Industry:

Productivity

Technologies / Platform:

- iOS
- Android
- .net

Business Benefits:

Customer / Consumer

- Doctors can connect with other doctors that is can chat with them within the app.
- Solution to allow doctors to search for jobs in their field.
- Users can post job, journal, events.
- Users can use mobile as well as web panel.

Accessibility

- Allowing Doctors to read about other doctors and write about themselves too.

Client

Ahlad, an Indian client.

Business Needs

- To create a web panel in .net for the users so that they could post job, post journal, post event.
- To create an app for doctors to communicate with each other and utilize their free time by using this app.
- To create a back-end so that all the users and the data could be managed.

Rapidsoft's Role

- To design and develop a mobile app for iPhone and Android that allows the doctors to enjoy four major features such as read, connect, write, jobs and calendar.

Solution Overview

Mobile App

- This app is for the doctors who can come into the app via their license no.
- Doctors can read about other doctors via read section (info added by the admin).
- He can also write about himself and can submit some thoughts about himself so that other users can read about him, the written matter will be sent to the admin and admin can upload the matter about him for the week the admin will be discussing about him
- There is a job section in the app where the doctors can see the vacancies and can apply for the jobs.
- The events/conferences submitted by the users from the website as well as from the back-end.
- The purpose of events/conferences so that all the users in the app could know and can schedule their time accordingly.
- The users can set their profile as well so that other users could know about the other doctors available in the app and could connect with them (chat).

Website

- The website allows the users to register and enjoy certain features.
- Users can post job, post event, post journal.
- Users will have to pay some amount based on the activity he selects.

Highlights:

- App allows doctors to connect with each other.
- Without connection the information of the users will remain private.
- App works in only online mode.
- Doctor of the week will be assigned by the admin and then that doctor will be the one who will remain in the read section.
- Doctors can search for the jobs and can apply for the job as well.
- Doctors can see conferences/events in the calendar section.
