Business Benefits:**Customer / Consumer**

- Simple to use
- Anti theft solution for retailers

Client

RTF Global is a company that provides security solution to the to the retail shops which can prevent the theft of displayed merchandise. The company has also come up with solutions and applications that help in preventing thefts in retail outlets and many more.

Business Needs

To create an anti theft application for retail stores that can be used to overcome the problem of smartphone burglary in the outlets. The app can be installed and activated on the smartphones that are displayed in the retail outlets to prevent their burglary.

Solution Overview

- Download the application from the App store
- Install the setup on the device
- The application installed device is plugged to the alarmcharge, VISE3 or mechcharge
- The AppSiren icon is pressed & the pin is entered by the end user which was given at the time of application installation
- Small AppSiren icon is displayed at the top left corner of the smartphone screen
- Any unauthorized removal of the device would make loud noise
- The alarm can be stopped by the end user by punching in the pin

Highlights:

- The smartphone can be displayed without the fear of theft
- Easy to install and use
- Secured solution for the smartphone theft
