

Project Profile

Location:

India

Project:

mReporter

Industry:

Insurance

Technologies / Platform:

- J2ME
- Record Store
- JAVA
- SQL Server
- Eclipse IDE
- Mantis Bug Tracker
- BaseCamp

Business Benefits:**Sales Force/Management**

- Dynamic survey form generation capability
- Sales force can use the forms using mobile app from anywhere
- Top Management view the information in real time

Accessibility

- Providing access to all sorts of forms for survey to sales force from anywhere any time

Client

A leading telecom operator in India.

Business Needs

To provide an application that would help the sales/ market research professionals to have remote access to the servers while on the go and record new information using survey forms. The form can be filled by respective people and the same shall be uploaded on the server for the manager to go through and approve the same.

Solution Overview**Registration**

- 1) Captures primary company details (company name, users etc)

Form Management Studio

- 1) Create, Edit and Delete forms on-the-fly
- 2) Dynamic forms auto-optimize for the handsets
- 3) Real-Time Form preview
- 4) Custom Form Templates

Super Admin

- 1) View, Add, Delete Registered Users
- 2) View Usage and Billing

User Management

- 1) Log Management
- 2) OTA App Management (Phase II)
- 3) Preventive Management (Phase II)

Highlights:

- Industry independent solution
- Real time information access
- Dynamic form creation studio
- Easily integrates with existing ERPs
- Multi level reporting management
- Dynamic Server
- Individual access based on the business activity with option for add/edit/update forms
- Fields relevant to the industry vertical & sales force requirement
