Project Profile

Watsoo LTL

Location:
India

Project:
Watsoo - LTL

Industry:
Logistics

Technologies / Platform:

- Java
- Angular JS
- MYSQL
- Mantis Bug Tracker
- Teamwork

Business Benefits: Customer / Consumer
- Manage logistic business which has LTL as nature of business
- Logistic Companies can
  o Manage their Employees & control their access to the system
  o Manage Clients, their Rate cards, fare calculation, communication
  o Track all the shipments & their status

Client

Watsoo Express is India's Leading Logistics and Transport service provider which addresses risks and challenges associated with today's Road Transportation industry.

Business Needs

To create a solution to manage and control all the work required to run a logistic business where Less than Truck Load (LTL) movement is the nature of business

Rapidsoft's Role

Rapidsoft has developed a Web solution software to manage logistic business where Less than Truck Load (LTL) movement is the nature of business

Solution Overview

1. Manage flow for different companies.
2. Admin of the system can create a new Company
3. Each Company will have a Super User who can manage data for the company.
4. Company's Super User can define geographical area where that company has to do their business. It's defined in form of Pincodes, Cities, Branches of that company and further Regions on broad level.
5. Android Mobile app for POD staff to enter the Docket/Shipment details

Highlights of the solution

1. Manage employees of the system by providing them different roles, controlling their access to different features of the system.
2. Manage all the branches under a Company.
3. Manage clients, their orders and Rate/ Tarrif plans.
4. Manage all the communication details done with any client.
5. Design Rate card/Tarrif for individual client
6. Automatic fare calculation for client orders using the associated rate card.
7. Control & manage movement of a shipment from pickup to delivery and in between the movement, manage THC (Truck Hire Challan) and TC (Trip Challan).
8. In Out scanning on warehouse level to mange all the incoming and outgoing shipments along with the stock report.
9. Tracking all the shipments with their current status.
10. Generation of delivery Run Sheets are generated by the system for the shipments which have to send for delivery.
