**Project:**

Alarm

**Industry:**

Utility

**Technologies / Platform:**

- iOS

**Business Benefits:****Customer / Consumer**

- Set and reset Alarm.
- Check weather of different cities
- World clock

**Client**

Alarm, the US based client.

**Business Needs**

- To enable the users to play games when the alarm rings.

**Rapidsoft's Role**

- To develop complete iOS Mobile App from scratch.

**Solution Overview****Mobile App**

- To An app that is created mainly for children who wants to get up at a time period and feels lazy by switching off the set alarm.
- This app allows the users to set alarm and they cannot slow down or switch off the alarm until they play a short game that wakes them up
- The app consists of 3 fun loving games :
  - Mathsgame
  - FishGame
  - Car Race Game
- Once the user plays this game then the alarm goes off.
- This is the simplest way to make the person engaged so that they wake up on time.
- Checking world clock
- Checking weather of different locations.

**Highlights:**

- Alarm Ring
- Different games on each alarm
- Alarm rings till game isn't played.
- See world Clock
